Hi Linda,

No problem. There is no hurry to find that article.

> Say, do you folks down under receive a newspaper cartoon
> called
> "Calvin & Hobbes?" Its about a 6-yr old boy and his stuffed
> tiger doll. Anyway, cute cartoon in a cartoon book featuring
> these two characters: Calvin is walking with his tiger in the
> woods (the tiger doll becomes a real tiger when no other people
> are present) and Calvin says, "I was reading about how countless

> of forest."
>
> Next frame, he continues, "Sometimes I think the surest sign
> that intelligent life exists elsewhere in the universe is that
> none of it
> has tried to contact us."

I live in Adelaide, South Australia, and I haven't this cartoon in
our local newspapers.

> Interesting statement, don't you think?

Yes, very interesting and very true. If I were an extraterrestrial I
don't think I'd like to contact our "civilization".

Regards,
Vlad

Date: 7 Nov 91 05:08:00 GMT

This is just to let you know that you are going to lose contact with
us for about two weeks or so.

UFORA HQ and Administration is moving to Cairns, tropical Far North
Queensland, on November 13, 1991. I'll poll Paranet on Saturday
evening, (our time) November 9, for the last time before I pack my
computer and send it off to Cairns. My wife and I are leaving on
Wednesday by car. It will take us about 5-6 days to get to Cairns. As
soon as I have phone connected I'll get in touch with Mike.

Because I am host for Paranet/UFORA you'll also lose contact with
Bill Chalker, Keith Basterfield and other UFORA associates who are on
Paranet/UFORA. We have established a UFORA Research Division in
Adelaide and Keith, as UFORA research officer, is going to be in
charge of this branch. Other than that everything else remains the
same. I'll post our new adress on Paranet as soon as possible.

Regards,

Vlad

Hello Keith,
Thank you for your kind answer! How very generous you are to offer to send a copy of the UFO Universe article about Price! Wouldn't it be terribly expensive what with copying and postage, though? If it is not too unreasonable and isn't too time consuming, I would like to accept your kind offer on the condition that you permit me to reimburse your expenses for sending this article. And this raises a problem -- when I've exchanged items with friends in England or been paid by British magazines, I've had difficulty using the funds or cashing checks, so that past experience makes me wonder what would be a fair medium of exchange for you...perhaps you have a use for U.S. stamps (maybe in return envelopes?) or perhaps you would have no difficulty cashing a check or depositing it in your bank? Please let me know what would work best for you, but I do want to cover the expenses or perhaps exchange something of equal value to be fair. Hmmmm....if funds were a problem, perhaps you would want a copy of the audiotape of the radio interview?
As you noted, hard evidence is sadly lacking in so many cases. I'm interested to learn more about the Price case...maybe it'll become an Omni magazine article later.
Thank you, again, for your kind reply and generous offer.

I once met I Brazilian man who claimed to have a photo of a UFO taken in Peru. When I told him it looked like a cloud, he responded..."Oh no, the UFO is hiding *behind* the cloud!

SW> I'd sure like to hear what some other pathologists have to say
SW> about Altshuler's conclusions....some of the non-ET, non-cult
SW> hypotheses. I've never seen anything in print anywhere. Has

JS> I, too, would like to see an independent review of Altshuler's
JS> findings.

I heard some M.D. out east critiqued his work - I'll have to see what I can dig up.

SW> Has Skeptical Inquirer ever done anything that you know of?

JS> Mostly they point to a book called "Mute Evidence" by Kagan and
JS> Summers, and write the whole thing off as predation. Little
JS> mention is made of cult activity (I wonder why, in light of
JS> Raffity's certainty that this is cult-related?)

Judging by the evidence I've seen, predation could be the cause of some mutes, but certainly not all. The precisely excised regions of tissue is not the type of damage one would expect from an animals jaws.

SW> BTW, did you know that the leading cause of "accidental" death
SW> in cattle is electrocution by lightning?

JS> No, but it makes sense.

    I thought some of the "jaw mutilations" might be explained by
    lightning strikes, since cattle spend a great deal of time
    grazing with their moist tongue and lips to the soil, creating
    an excellent electrical ground. I asked Altshuler about this,
    and he responded that these types of wounds would exhibit
    "charring" effects, which are *not* seen in some of the facial
    mutes.

SW> I am certain that Satanic activity does account for some
SW> mutes,...

JS> Why, if there is no solid evidence? If there is, where can we
JS> read about it? See, I'm skeptical of BOTH sides on this one.

    There are some cases I've seen here in Illinois, where chest
    cavities have been savagely torn apart, and hearts removed,
    leaving little doubt that some aberrant personalities were
    involved, although the perpetrators were not apprehended.

    Anyway, please keep us informed on the latest in the AZ cases.

Subject: End of Ogden?
Date: 8 Nov 91 05:17:00 GMT

Hi Peggy,

I think you've done a great job w/Ogden, but it saddens me to see you reach this apparent impasse. I'm sure you'll agree that this happens all too often in this crazy field. (As some of us might say, far too often to be chance alone.)

Anyway, I shall be certain to keep you informed of anything further re: this story that you might find useful, but it does indeed look like the well has gone dry.

Perhaps you can pick up on Jim Speiser's AZ mutilation case. At least people are willing to talk about that one, and I'm sure it would be of interest to your readers.

Thanks again - and best of luck,

Sheldon

I've forgotten most of what little I knew of Kirlian photography, so please bear with me.
Does the process yield results that really mean much of anything? Are there certain things seen in the images that mean one thing, and other things that mean another? Or is it more of a curiosity?

Still have not seen the whole show yet. I did have a devil of a time all weekend (in costume) so the tape sits in the VCR waiting for me to sit still for an hour.

I got the GIFs of the Ogden object, but the printer or program here makes hash out of them. So I still know nothing. (as usual?)

The Orcadian is the weekly newspaper of Orkney. Nothing special in three issues so far. Big news about a roundabout that was the first on the mainland, and that they had three accidents the first week. The ban on shellfish has been removed, Paralytic Shellfish Poisoning. First annual Science Festival... Nothing about archaeology or paranormal yet.

Unfortunately neither of these things constitutes proof of alien visitations. The only proof they provide is of strange crop formations and strange animal mutilations. Both mysteries are still whodunits.

Subject: Revelations
Date: 1 Nov 91 04:34:00 GMT

On Sunday, October 27th, I had the great pleasure to meet with Jacques Vallee while he was here in Denver. He has recently published a new book titled "Revelations." I have read the book and will be doing a book review of it very soon, but I did want to post something about Vallee's outstanding work. The book deals with the aspect of ufology that most of us will not accept: disinformation and who is behind it. I am sure that most of the ufo community will find the book caustic, however it is a very refreshing look at just how badly the research community has faltered in their efforts to bring an understanding of the UFO phenomena. Get the book and read it.

I apologize in advance if I was not suppose to post this after
reading it on CompuServe. If this is a wrong thing to do, please
let me know, and I will not do it again!

Is the following what really happened, or just a cover up of a real
UFO sighting by many people?

TEL AVIV (NOV. 7) DPA - A soldier who fell asleep
on guard duty had hundreds of Israelis believing
that aliens from outer space were invading their
town, and caused a full military alert to be
annouced, Israel Army Radio reported Thursday.
   Hundreds of residents of the northern town of
Bet She'an had reported seeing a mysterious circle
of light high in the sky on Tuesday night.
   Police confirmed the sighting and in
conjunction with the army declared a military
alert until the light disappeared at dawn.
   The mystery was solved the next day when it was
discovered that a soldier who nodded off at his
guard post slumped against a powerful searchlight,
flicking on its switch and directing its glaring
beam into the sky, the radio reported.

 * Forwarded from "Fido UFO Echo"
 * Originally from Douglas Smith
 * Originally dated 11-03-91 21:37

   Hey folks, there have been some strange things happening down here in Florida & Alabama. The earth has been shaking for no apparent reason! Here's an excerpt from yesterday's Pensacola News Journal:

UNKNOWN TREMORS SHAKE CITIZENS, BEWILDER OFFICIALS

   West Florida and South Alabama rattled Friday, but no one can explain the mystery jolts.
   The National Earthquake Center in Golden, Colo., didn't record any tremors in the area, but the News Journal and the Weather Service recieved several reports of shaking at about 11 a.m. and 3:30 p.m.
   The calls came from Perdido Key, Ensley, downtown Pensacola, and Mobile, Ala.
   "I was out in the yard working on my car and the ground started shaking under me, so I got away," said John Marchese of West Gregory Street near downtown (Pens). "The windows in the house nearly broke."
   Pensacola Naval Air Station and Eglin Air Force Base spokesmen said they had no reports of supersonic flights or other military activities that could explain the tremors.
   "We had the same kind of weird thing happen about two months ago, and we didn't ever resolve what happened," said Eglin spokeswoman Lois Walsh.
   There is one major fault in the North-west Florida area, and it is inactive.
  It runs from beneath the Gulf of Mexico northwest through Santa Rosa County and the Jay oil fields.
   It bends in a westward arc through southern Alabama, southern Mississippi, northern Loisiana and Texas, where it ends.

   -Article by Ginny Graybiel
    of Pensacola News Journal

   Yep, it's a strange thing. I myself didn't experience the tremors this time, but I did feel the ones that happened a few months ago. The windows start rattling, and there is a low rumbling noise.
   That tremor happened Friday (Nov. 3rd). A second tremor occured the next day (Saturday, the 2nd). I'll post the article that appeared in today's paper about it in my next message...

   The following is an excerpt from the Pensacola News Journal, concerning a series of tremors which have been shaking the Florida/Alabama area:

TREMORS CONTINUE IN AREA
-Jokester Blames Gulf Breeze UFO-

   The ground in Pensacola continued to shake Saturday, but for the second straight day, no one could explain the tremors.
   Police and local military bases were swamped with calls Saturday from people wanting to know what caused the ground to shake about 4 p.m.
   "It really was scary, it honestly was," said Cheryl Swanson, who felt her house rattle.
   The tremor was strong enough to break windows and knocked the lamps off a table at one man's Ensley home, a sheriff's dispatcher said. She said operators answered more than 100 calls from people asking about the shake.
   What caused the ground to move is still a mystery. Similar tremors were reported at 11 a.m. and 3:30 p.m. Friday.
   Local Military bases deny responsibility and the NAtional Earthquake Information Center in Golden, Colo., reported (again) no tremors in the area. Russ Needham, a geophysicist with the center, said he was stumped. "I can't say it isn't an earthquake, but if it was, it was too small for us to detect," Needham said.
   He speculated that the tremor could have been caused by an aircraft traveling at supersonic speeds.
   But officials at Eglin Air Force Base and Pensacola Naval Air Station said the military is not responsible.
   "We don't have anything to do with it, but we're trying to find out," said NAS Operation Specialist 2nd Class Harold Brown. "We felt it over here, also. We're getting one call after the other."
   "It's not coming from us," Eglin spokeswoman Capt. Susan Brown said. "It shook my back door, too, so I know what you're talking about."
   Air Force Sgt. Ronald Smith said he started recieving calls about 3:50 p.m. from Orange Beach, Ala., to Destin (Fla).
   Matt Carter, 17, of Gulf Breeze said the kitchen windows rattled.
   Al Rappuhn, 66, who lives about three miles from NAS, said his windows rattled and his house shook for about 10 seconds.
   "I wonder if it's that gang out in Gulf Breeze moving those UFO's on us?"

   - Article by John Fritz,
     Pensacola News Journal

   Weird, wild, wacky shtuff, eh?

Recently, we sent out over 300 complimentary issues of ParaNet's official bi-monthly news magazine, Continuum. I would love to hear some feedback on our efforts. Also, if you haven't sent in your subscription, hurry! The next issue is on its way to the layout department and should be ready for mailing in a couple of weeks.

Thanks,

Mike
